Objet : support on your demo

Paris - the 20th of June, 2019

Dear Marco,

I wanted to send you this message of support following your national demonstration of June 14th. The fact that all representative unions of metallurgy are reunited is a positive and strong signal, as your sovereignty and populist government faces you with considerable challenges.

As a trade union, we must be ready to take up these challenges and be proactive, in particular by calling for more democracy and social justice, for all citizens, for every worker, and not to leave nobody on the side.

Your claims, such as :

- Invest to create jobs in environmentally sustainable industry
- Increase wages through collective bargaining
- End precarious work by extending rights to subcontractors and increasing workers' participation
- Use productivity gains from new technology to create new jobs, raise wages and reduce working time
- Reduce taxes on workers and fight tax evasion
- Pay fair pensions and extend the social welfare net
- Invest in workplace health standards and guaranteed safety training

Are very much shared by our federation.

General Secretary of the FGMM-CFDT for a year now, I would very much like to meet you to discuss our common challenges. See you soon dear friend.

Sincerely yours,

Stéphane Destugues  
General Secretary
